Artwork Guidelines

- All artwork submitted on disk or via FTP should be provided with a directory list of files, a hard copy layout, and a complete set of written instructions with all your contact information.
- All artwork supplied, requiring custom color matching, should be provided with a hard copy of required colors for reference.
- All artwork supplied that is not actual size should be provided with the created scale and the finished scale required.
- All artwork supplied should be submitted in the native software format in which it was created. See the supported list of software below.
- Please backup your files and do not submit the only copy of a file, accidents can happen.

Vector Artwork Setup

- All artwork using fonts and logos should be created as composite file in a vector-based program using the required images, graphics, and text.
- All artwork that includes placed images must be accompanied by the required image files.
- All fonts should either be converted to outlines or the screen fonts and printer fonts must be included with your files.

Bitmap Artwork Setup

- All artwork supplied for rotary screen should be submitted at a resolution of 254 dpi.
- All artwork supplied with color separations should be submitted as individual files.
- All artwork containing fonts and logos should be provided as vector art and not as bitmap art.
- High resolution files are required for large scale prints. The specific dpi varies depending on the output type and the finished size.
